**HARRY D. FARMER**

"The average woman has a vocabulary of only 800 words" according to educational authorities. Mostly synonyms for "Gimme."

Argentina is experiencing the hardest winter she's known for twenty-five years. But of course it's not so bad coming in the summer.

A woman who was summoned because her dog bit a neighbor says how the devil dogs run in the world. Now a fine has made him five dollars drifter.

Rural paper says: "Mrs. ... was found dead on a bath tub due to a paralytic stroke." That's a new kind of bath tub.

A dietitian tells us strawberries are rich in iron and blood. Best thing he'd be true to tell us they're as tasty as spinach.

We read that the hemp crop is being raised in the province for hampers.

A Californian town has a woman mayor who says politics is fun. Probably got her information from the movies.

"Extraordinary" announced by Credit Men, a headline says. Began thinking that.

Members of a suffrage women's convention welcomed a political candidate at 2 p.m. and invited on his giving a speech. Probably looking for a cure for hennia.

AFTER ALL, THINGS AREN'T SO BAD. HIT MACKINAC GOT A LAUGH WHEN HE HEARD THE DEBILITATED OF THE TONY CABINET.

Sir Arbuthnot-Lane says few women have perfect legs. We're not in a position to contradict him.

A French warship is now in Montreal harbor. It's a review of the Canadian fleet to improve the fleet.

Which the difference? In the old days there was a salmon on every river, and now there's a filling station.

From a correspondence column: J. S. writes that he had an obstinate itch paid on one area of his skin. He cured it by washing with a good soap and water several times a week. Wouldn't he had a bad idea now if he took a chance and had a bath.

An advertisement offers "White One-Two Off." We never buy second-hand shirts.

Headline in a Chicago paper: "Canada War on Royal Boudier Shakes Empire." Gosh! And the Empire never knew a thing about it!

From an Eastern paper: "There are 43,000 fewer homes in England this year than last, and 43,000 fewer roofs." We understand a high class of citizenship had left there.

A NEW ENCYCLOPEDIA. The permanent wave is a new thing. Not women don't care a fraction to get it at a given time or place.

Most women's personal attraction. The process, they say, is a tireless one. And calls for lots of patience. But doing one's hair is a great deal.

Was scarcely a source of pleasure to it's not my intention the wave to knock.

In the present rhyming league, or with some of these glibly guys who knock.

On the whole, they are all right. One question alone intrigues me, viz. in a of a lasting nature.

On can inform me what it is that leads to the consummation? I think that his name's not mine.

And the other, a cause for sorrow. That's all it is permanent wave. It's perfectly straight tomorrow.

# 11 Camp Boys Are Drowned

Victims Attending Anglican Church Camp at Balsam Lake, Ontario

OFFICERS PLAY HEROIC PARTS

Director Who Can't Swim Gives Place to Others, Sinks to Death

Canadian Press TORONTO, July 22.—The bodies of 11 boys who drowned in the Balsam Lake tragedy of yesterday, will likely be given public recognition.

Alfred Marshall, who left the canoe to lighten the burden, was seriously wounded in the great war, where he served as runner in the Canadian Corps. He had injured his knee some time ago, and was unable to swim.

Marshall dived from the overturned canoe in order to give the younger boys a chance for their lives. Marshall's wife said that he was lying in the water, and she was unable to reach him.

Marshall's death was a tragedy. He was a man of many talents, and a great leader. His death was a great loss to the community.

From a correspondence column: J. S. writes that he had an obstinate itch paid on one area of his skin. He cured it by washing with a good soap and water several times a week. Wouldn't he had a bad idea now if he took a chance and had a bath.

# Cherhill Killer Is Heading West Toward Mountains

HEAT BLISTERS EAST; CLAIMS 2 SCORE LIVES

Mercury Jumps Over Century Mark and Breaks Records

PROSTRATIONS RUN INTO HUNDREDS

New York Jots Down Hottest Day Since 1885

Associated Press NEW YORK, July 22.—The heat sweated today in a heat wave that came in from the mid-west taking a toll of two score lives and prostrating hundreds in the cities on its course.

Temperature records were broken here and elsewhere in the second of the high marks were Hagerton and Frederick, Md., 102; Keokuk, Iowa, 101; Philadelphia, Penn., 100; New York, 99; Chicago, 98; Milwaukee, 97.

In New York, it was the hottest July day except one since 1885. The heat wave had been in the air since the first of the month, and it was the hottest day in the history of the city.

A score of great deaths were reported in Michigan, three in New York, and one in New Jersey. In New England, the heat was less severe.

Craps were damaged throughout the west and south, and across damage from forest fires in Montana.

Ontario Bulletin TORONTO, July 22.—Rain fell early this afternoon in the Toronto area, but the heat continued, and it was the hottest day in the history of the city.

After humid heat and thunderstorms, the heat continued, and it was the hottest day in the history of the city.

# Farmer's Family Stricken

Four Child of Henry Hammermaster Injured in Escaping

2 BOYS AND GIRL LOSE THEIR LIVES

Tragedy Occurs When Barn Takes Fire Shortly After Midnight

Associated Press WINNIPEG, July 22.—Three children of Henry Hammermaster, a farmer residing 1 mile west of Nisku, 7 miles from Lethbridge, were burned to death at 12:30 Thursday morning when spontaneous combustion in grain stored in the barn set the building on fire, the children, who were sleeping in the barn, being trapped on the upper floor.

A fourth child, Jennie, 10, escaped the flames by jumping from the hay loft window. She suffered serious injuries. She is at the Minto hospital in a critical condition.

The children who died in the barn were: Edna, 12; Herman, 12; and Robert, 10.

No Inquest Necessary. Constable Wilson of the Alberta Provincial Police, who was on duty at the scene, said that the fire was caused by spontaneous combustion in grain.

The father of the children had been in the barn at about 11:30 p.m. when he saw the fire. He tried to get the children out, but they were already dead.

The fire was caused by spontaneous combustion in grain. The grain was stored in the barn, and it caught fire.

**Attend Picnic Party**  
**Held at Horse Hills Farm**  
 By U. F. A. Assisted  
 By U. F. A. Entertain  
 At Attractive Annual  
 Affair

A jolly picnic party was given by the U. F. A. and the C. P. W. A. at the Horse Hills farm, on Wednesday afternoon and evening when over 100 members of the two societies and their families were present. The picnic was held on the grounds of the Horse Hills farm, on Wednesday afternoon and evening when over 100 members of the two societies and their families were present. The picnic was held on the grounds of the Horse Hills farm, on Wednesday afternoon and evening when over 100 members of the two societies and their families were present.

**WET WINGS**  
 One night the rain came down and made rivers at the sides of the streets. It made everything seem different from the way it was before. Emily went out walking. She looked at the close leaves on the little river running past her house. There on the top of the water was a butterfly. Emily found a stick and held it to the butterfly to crawl upon. She saw it was a very nice butterfly. Emily found a stick and held it to the butterfly to crawl upon. She saw it was a very nice butterfly.

**Weddings**  
**McFarlane-Knox**  
 Miss Kathleen Knox, daughter of Mr. and Mrs. J. H. Knox, was married to Mr. J. H. Knox, on Wednesday evening at 8:30 when Rev. C. F. McFarlane officiated. The bride was given away by her father. The wedding was a very quiet affair. The bride was given away by her father. The wedding was a very quiet affair.

# Consider the merits of this Alberta Industry!

Do not overlook the opportunity to secure a ground floor interest!

**T**HIS is the Age of Oil—an era of Industry in which Petroleum has forged to the front rank among natural resources—the prime ally of Industry. To suddenly shut off the supply one day would seriously cripple the work of the world and lose millions of dollars.

Alberta has come into the spotlight as one of the world's greatest petroleum fields. At this moment we are on the very threshold of big production. Authorities agree that within a year we shall have taken our place as the very greatest petroleum area in existence.

One Alberta oil well alone is producing \$2,000,000 a year. At the very door of Edmonton is the Wainwright field, only a part of the great oil area of the Province, the development of which is already under way.

**A**T PRESENT Canada pays to the United States about \$120,000,000 a year for petroleum and its products. Here in Alberta alone, with boundless potential oil supplies at our door, we pay millions annually for gasoline. High proportion of the sum is paid for refining and transportation charges from United States to Canada.

Eighty per cent of all the profits in oil, according to the report of the United States Investigating Committee which dissolved the Standard Oil Trusts, was made by those who refined and marketed the oil.

It is obvious that even at our present stage of oil production in this Province, a Refining and Distributing

Company is an enterprise for which there is a splendid waiting opportunity.

**I**T WAS in answer to this opportunity that the Alberta Refineries Ltd., was organized and a refining plant installed. That the enterprise is justified is amply proved by the widespread and enthusiastic response of the consuming public when the product "PEP," a high-grade gasoline, was put on the market. . . . Today the first plant capacity of 1000 barrels of crude oil a day is unable to cope with the demand. Another plant of 500 barrels capacity is projected and this will take care of not only the present output of the Wainwright field, but crude oil from other fields as well.

**T**HE purpose and program of the present organization, "Refineries Distributors Ltd.," (shares of which are now offered to the public) is to market and distribute "PEP" products and to erect a "Cracking Plant" which will extract from the crude oil of the Wainwright field as high as 50 to 70 per cent of gasoline. This is a highly important economic process at the present stage of crude oil production.

The immediate distributing program of Refineries Distributors Ltd., includes the erecting and maintaining of Service Stations for the marketing of "PEP" gasoline and "PEP" products.

The success of this organization is practically assured. The details in which the investor will be closely interested are given below.

"PEP" is the appropriate name given to the gasoline product of Alberta Refineries Limited, produced from the crude oil of the Wainwright field.

"PEP" has justified its name as a lively, volatile, anti-knock gasoline which motorists insist upon after once having used it. Today the present "PEP" plant is inadequate for the demand.

## + Cracking Plant, an economic marvel

Prof. Gustav Egloff of the Universal Oil Products Company Research Laboratories, in a lecture before the American Institute of Mining and Metallurgical Engineers, spoke emphatically upon the wonderful economy and value of the "Cracking Plant" in the production of high grade anti-knock Gasoline from crude oil.

He claimed, and showed, by tests and actual production in many fields, that by the Dubbs process, from 50 to 70 per cent gasoline is extracted from the crude and showed that from the Kevin Sunburt crude this percentage is always obtainable. The heavier crude from the Smack-over field is mentioned as showing "the wonderful potentialities of this process."

"One of the wonder oil fields of the United States is the Smack-over Arkansas, which is still producing 180,000 barrels per day, of which 165,000 barrels (December 31, 1925) is heavy oil. This oil, of asphaltic character, is not very satisfactory as a fuel oil due to its emulsified water, high sulphur contents and other properties.

"The general inquiry when a new Smack-over well was brought in 'What will they do with it after they get it?'

"One leading oil man stated that Smack-over 'Heavy crude' had everything in it it should not have for a refiner. Yet, despite these pessimistic statements, Smack-over heavy oil is being commercially cracked into over 50% gasoline. Smack-over heavy crude oil production of 165,000 barrels daily can be converted into 81,500 barrels of gasoline per day by the cracking process."

The results achieved promise those which will be accomplished by the Cracking Plant in treating the crude oil from the Wainwright field, as the chemical composition and gravity of the oils are almost identical.

"The Dubbs Process is so flexible that it converts any type of oil without change of principles or equipment into gasoline. Commercial plants are in operation or under course of construction in various parts of the world, such as Japan, Borneo, Java, and Dutch West Indies, and Russia, and many parts of the United States."

## Refineries Distributors Limited

208 McLEOD BUILDING, EDMONTON, ALBERTA

Capitalization - \$1,000,000

90,000 Shares, Preferred, \$10 Par

100,000 " Common, \$1 "

Present Offering: The balance of a Block of 30,000 Preferred Shares at Par each Preferred Share carrying a Bonus of One Common Share.

### DIRECTORS:

JOHN L. MERCER, Edmonton, Alberta, President.

H. A. STEWART, Vancouver B.C.

Vice-President and Managing Director.

M. C. HAMMOND, Edmonton, Alberta.

J. C. C. BREMNER, Clover Bar, Alberta.

ROBERT McDONALD, Edmonton, Alberta.

W. A. TRIMBLE, Edmonton, Alberta, Secretary-Treasurer.

REFINERIES Distributors Ltd. was organized with a Dominion Charter, capitalized at \$1,000,000, divided into 90,000 8% Preference Shares with a par value of \$10.00 each; and 100,000 Common Shares with a par value of \$1.00 each. Paid up capital is \$200,000.

The company was organized to market the "PEP" products of the Albert Refineries Ltd., and also to produce gasoline and other products from crude petroleum by means of a cracking plant, this plant employing the Dubbs process, a great scientific and economic advance over the ordinary refining plant, extracting from 3 to 5 times as much gasoline from the crude oil.

The present issue, for the purpose of carrying on the immediate program of the company, is 30,000 Preference Shares, of which 10,000 shares have already been sold. The Preference Shares are offered in units of 1 at par \$10.00, and each of these Preference shares carries a bonus of 1 Common Share.

The initial program of the company is to erect and maintain a number of Service Stations throughout the Province for the marketing of "PEP" gasoline and petroleum products, a profit of 3c per gallon clear of freight being available from this source alone at the present market prices.

Also to erect a "Cracking Plant" at a cost of \$150,000. This will have a capacity of 1,000 bbls. of crude oil and will produce from this a minimum of 500 bbls. of anti-

knock gasoline every twenty-four hours. At 35 gallons to the barrel, this shows a total output of 17,500 gallons a day.

Apart from the individual profit of the cracking plant unit working at capacity, the output marketed through the service stations shows a distributing profit of \$525.00 per day net. This alone will show a handsome dividend on a \$1,000,000.00 capitalization in addition to the 8% per annum on the preferred shares.

Detailed figures will show this enterprise to be one of the very highest potentialities for profit. We shall be pleased to send a digest of the situation, based upon actual conditions, to the earnest investor.

In the meantime the soundness of the proposition will appeal to the investor who realizes that these pioneer enterprises in industry, based directly upon natural resources, reap the rich reward.
